

## EagleBurgmann nominated for PDO's Rabab Harweel Integrated Project

Muscat, Oman: EagleBurgmann Middle East, the leading sealing technology providers to the Oil & Gas industry has been nominated to provide sealing solutions for PDO's Rabab Harweel Integrated Project. The project will be located in the Harweel Cluster of fields in the South of Sultanate of Oman.

The new facility will have to capacity to export 10,000 cubic meters of oil per day along with miscible gas injection (MGI) via an excess gas pipeline from Harweel to RHIP. Additionally, sour gas injection, gas-fired power and steam generation plant, and an integrated gas pipeline between Rabab Harweel are also in the scope of this project. The facility will be using six high pressure (350 bar) compressors manufactured by MAN Diesel Turbo, Zurich.

In 2012, EagleBurgmann Middle East initiated planning for the project and presented to PDO the capabilities of their Dry Gas Seal solutions for high pressure applications. Consequently, PDO's engineers accompanied EagleBurgmann Middle East experts to visit the manufacturing facilities in Germany. They were able to see first-hand the precision and quality of EagleBurgmann's manufacturing process. Subsequently, the team visited the DGS Centre of Competence in Dubai; where they were able to tour the testing and servicing facility available to meet their needs.

Earlier this year, PDO and MAN Diesel Turbo shortlisted EagleBurgmann and Flowserve to provide Dry Gas Seals for this project but due to diligent work from the EagleBurgmann team and performance of their DGS in the existing Harweel 2AB facility contributed to the nomination of EagleBurgmann as the sole seal vendor for the upcoming project.

Babak Khodadadi, Vice-President EagleBurgmann Middle East added, "EB's vast industry knowledge, technology performance, and project execution capabilities makes us one of the most preferred partners of end users in the industry. We look forward to working with PDO to successfully deliver the project as per defined scope & timelines."

### About EagleBurgmann Middle East:

EagleBurgmann is one of the world's leading sealing technology providers. EagleBurgmann Middle East FZE was founded in 1996, as a subsidiary of EagleBurgmann GmbH – Germany.

Over the past 15 years, a motivated team of professionals has been gaining customer's trust through high quality products, flexible warehousing facilities and outstanding service with a growing headcount of 35 dedicated employees. EagleBurgmann Middle East delivers safe and reliable performance in many applications: Oil & Gas, Petrochemicals, Refineries, Power & Water...

EagleBurgmann Middle East offers a wide range of sealing solutions: mechanical seals and supply systems, magnetic couplings, expansion joints, diaphragm couplings, and a diversity of services ranging from after sales up to service agreements. With its Service Centres located across the GCC (Dubai, Ruwais, Kuwait, Oman and Qatar), EagleBurgmann Middle East is committed to customer proximity. A preferred partner, EagleBurgmann is always up and ready to provide the best designs and recommendations, serving its local customers with the best of its technical abilities.
